Figure 1: Power up Q Station

Installation Steps:

1) Plug in Power Adapter to Q Station.
2) Connect the Q Station to the LAN of your Home Router with LAN cable (optional).
   (If you want to connect internet wirelessly, please refer to Q Station User Guide.)
3) Connect the Audio Cable from your Q Station to the AUX of your stereo or speaker.
4) Make sure the indicator light of Q Station is blinking with red (left) and blue (right).
5) Screw-in the Q Bulbs.

2. Connect your smart device to Wi-Fi

By changing your Wi-Fi connection to "bellnetXXXXXX", you will connect to the Q Station.

Notice:

- By default, Q Station SSID is "bellnetXXXXXX". No Encryption. (XXXXXX is the last 6 digit of your MAC)
- Once it is successfully connected to the Q Station, the right indicator light should be a steady blue color. Otherwise it will be blinking.

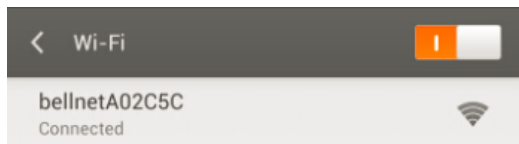

Figure 2: Connect Q Station SSID

3. Play music & Light show (use your smart phone)

1) Install any music APP which supports DLNA protocol (e.g. BubbleUPnP).
2) Run BubbleUpnp. *(Figure 3)*
3) Add one song in PLAYLIST.
4) In RENDERER, choose "bellmusicXXXXXX". *(Figure 4)*
5) Click "Play" button to play music.

Notice:

- By default, Q Station Speaker Name is "bellmusicXXXXXX".(XXXXXX is the last 6 digit of your MAC)
- DLNA protocol allows you to stream music to the stereo or speaker which is connected to the Q Station. And the Q Bulbs will blink synchronously with your music.
